**Period for Reply** -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 12/17/2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. The indicated allowability is withdrawn in view of the reference(s) to Poole and McCulloch. Rejections based on these reference(s) follow.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 7 and 8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 7, a claim scope of "consisting essentially of" is set forth. However, in the oxidizer part, a scope of "comprising" is recited. These differing scopes are in conflict, e.g., inconsistent, whereby the ultimate scope of the claims is indefinite.

Claim 8 includes terminology regarding MAK and TLV values, these terms are variable and thus render the claim indefinite. Also, note that since these represent industry standards, they are subject to change over time.

### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 7 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Poole (5035757) in view of McCulloch (3725154).

Poole discloses a gas generating composition comprising a) aminotetrazole including 5-aminotetrazole, b) peroxides, c) alkaline earth metal nitrates, and d) carbonates (col. 5 and 6). Note that Applicant's claims do not require the reducing agent or coolant since the claim limitation recites "up to" which includes zero.

McCulloch teaches that it is known to use ferrocene as a catalyst in a gas generating composition (col. 3, lines 15-30).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to use the ferrocene as taught by McCulloch since McCulloch suggests that it is desirable to include ferrocene as a catalyst in gas generating compositions in order to control the burn rate and since Poole discloses that burn rate is a variable that is desired to control (col. 3, lines 59-63).

### ***Conclusion***

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Aileen B. Felton whose telephone number is 571.272.6875. The examiner can normally be reached on Monday-Friday 6:30-4:00, except alternate Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jerry Lorengo can be reached on 571.272.1233. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
